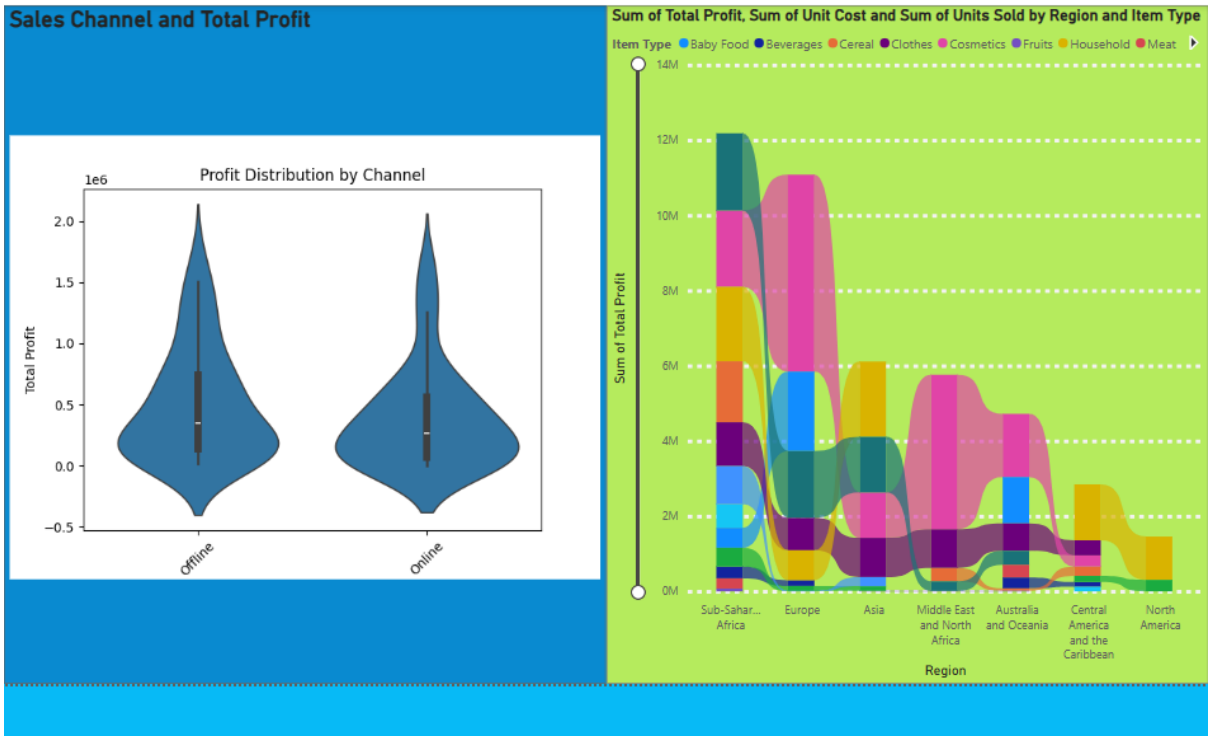
SALES ANALYSIS REPORT



Violin Plot – Profit Distribution by Channel

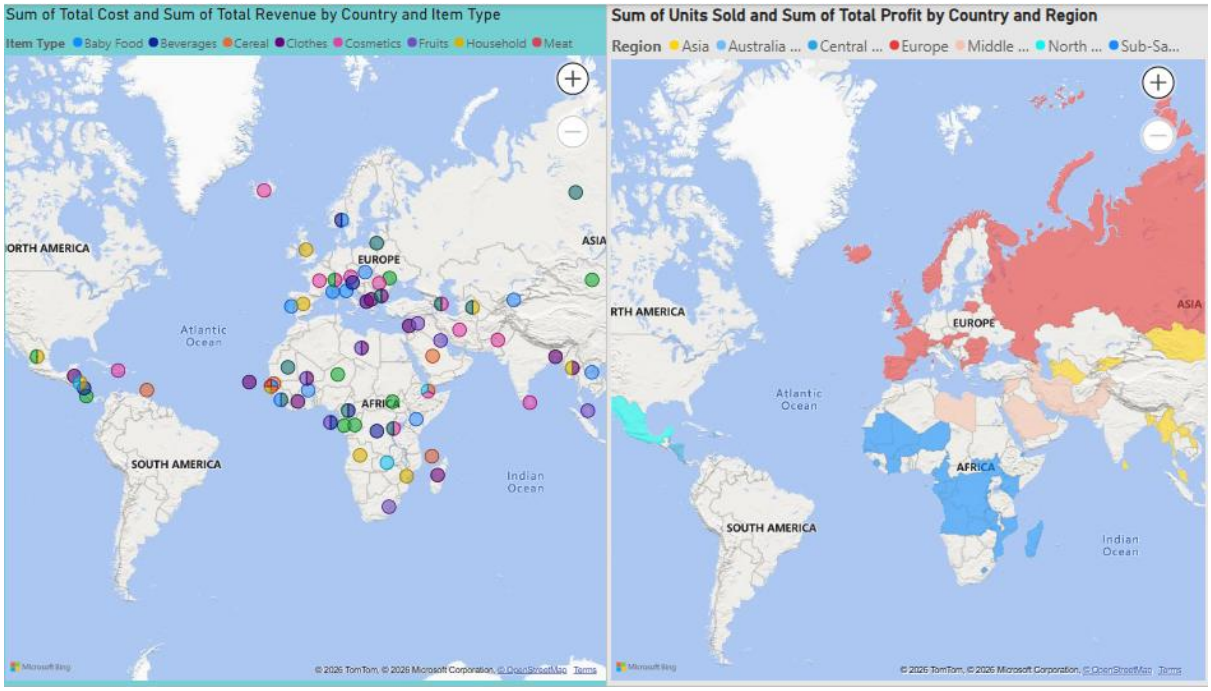
- *"This chart uses the **Total Profit** field grouped by **Sales Channel** (Online vs Offline)."*
- *"It shows how profits are distributed across the two channels, not just the average."*
- *"From this, we can see whether online sales or offline sales tend to generate higher profits, and how spread out the values are."*
- *"It also helps spot outliers — for example, unusually high or low profits in one channel."*

Stacked Area Chart – Profit, Unit Cost, and Units Sold by Region & Item Type

- *"This chart uses **Total Profit, Unit Cost, and Units Sold**, grouped by **Region** and **Item Type**."*
- *"It shows how different product categories contribute to overall profit in each region."*
- *"For example, Baby Food may dominate in Sub-Saharan Africa, while Cosmetics may be stronger in Europe."*
- *"It highlights regional differences and lets us compare which regions and items drive the most profit."*

SALES ANALYSIS REPORT

- *"The stacking shows the combined impact of multiple categories, so we can see both sales volume and profitability together."*



Left Map – Total Cost & Total Revenue by Country and Item Type

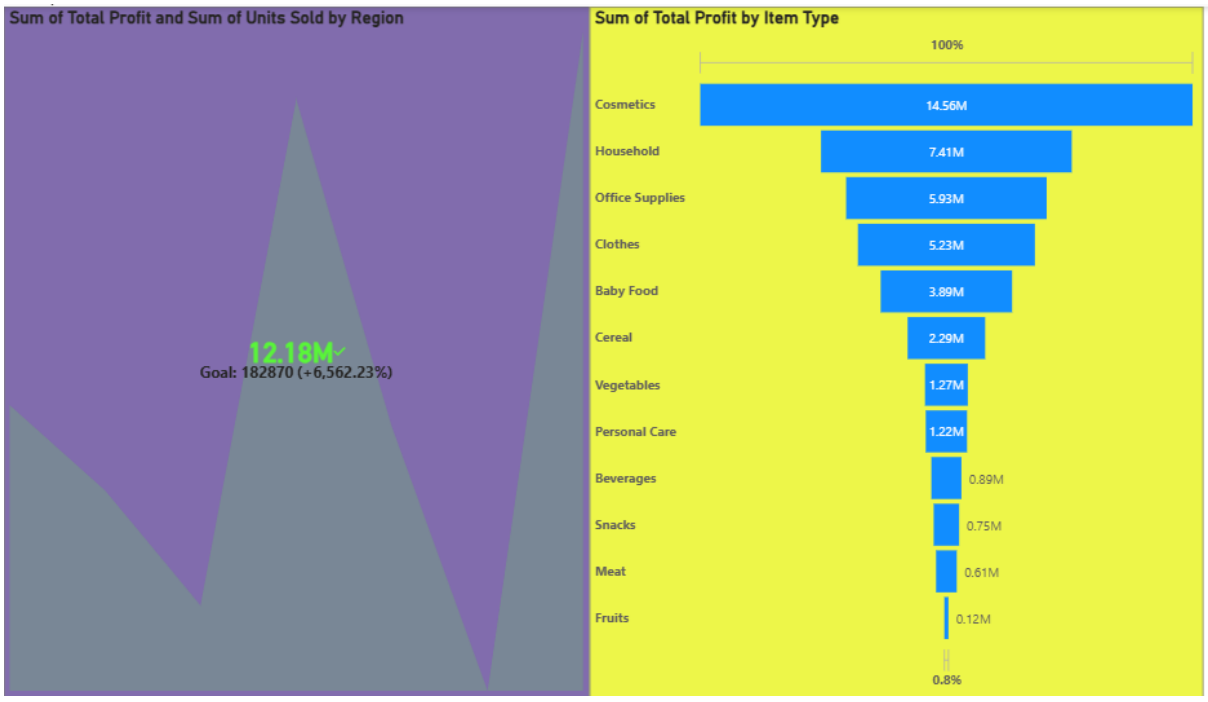
- *"This chart uses **Total Cost** and **Total Revenue**, grouped by **Country** and **Item Type**."*
- *"Each circle represents a country, and the color shows the product category — like Baby Food, Beverages, Clothes, etc."*
- *"The size of the circle reflects the magnitude of cost and revenue for that item type in that country."*
- *"This helps us compare which products are selling more in which countries, and whether revenue is higher than cost."*

Right Filled Map – Units Sold & Total Profit by Country and Region

- *"This chart uses **Units Sold** and **Total Profit**, grouped by **Country** and **Region**."*
- *"Countries are shaded by region — Asia, Europe, North America, Sub-Saharan Africa, etc."*
- *"The shading intensity shows how much profit and how many units were sold in each region."*

SALES ANALYSIS REPORT

- *"This helps us identify high-performing regions and compare profitability across different parts of the world."*



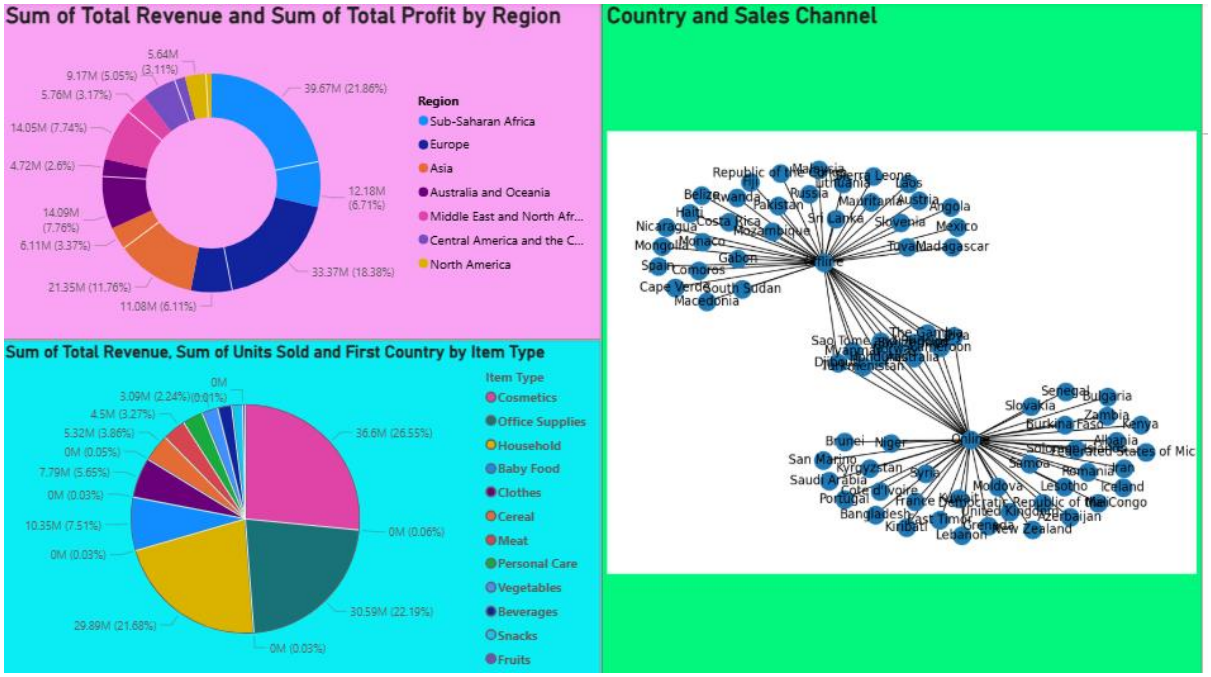
Area Chart (Left Side – Profit & Units by Region)

- *Shows comparison of **profit and units sold across regions**.*
- *Helps identify which region contributes more to overall profit.*
- *Area shading makes it easy to see volume difference visually.*

Funnel Chart (Right Side – Profit by Item Type)

- *Displays ranking of item types based on profit.*
- *Shows which product category generates highest profit.*

SALES ANALYSIS REPORT



Donut Chart (Top Left – Revenue & Profit by Region)

- *Shows percentage contribution of each region.*
- *Easy way to see distribution of revenue.*

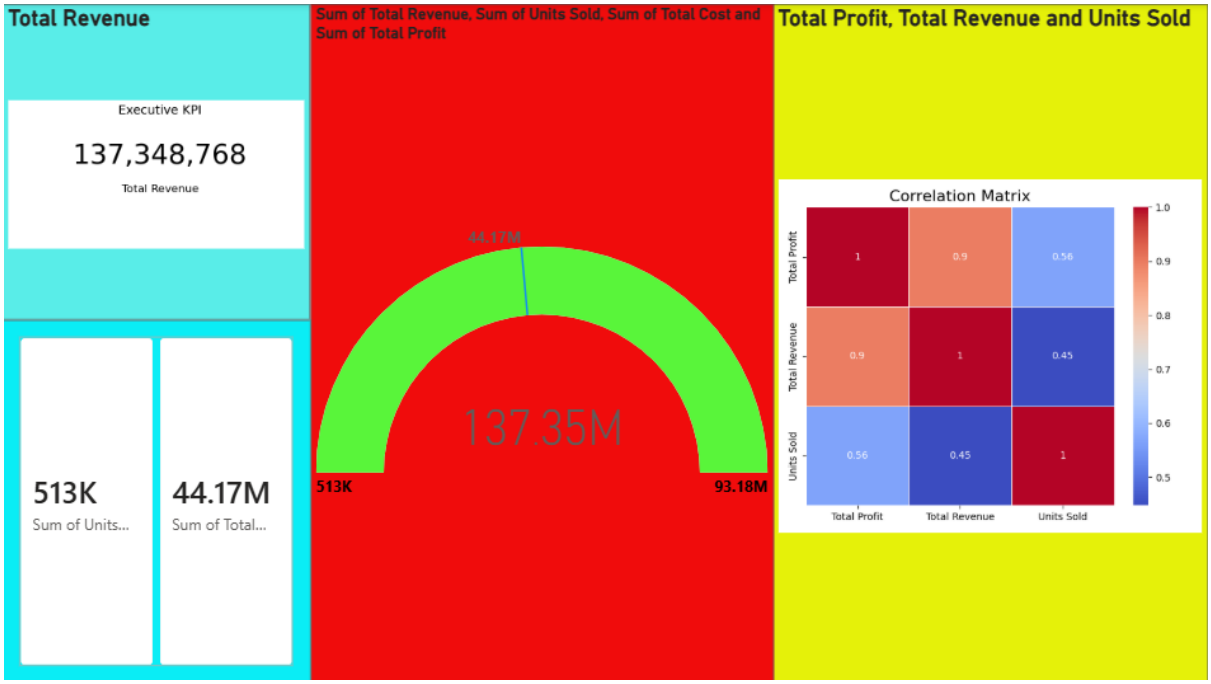
Pie Chart (Bottom Left – Revenue by Item Type)

- *Shows proportion of revenue from each item category.*
- *Visual representation of product distribution.*

Network Graph (Right Side – Country & Sales Channel)

- *Shows connection between countries and sales channels.*
- *Visualizes relationships between entities.*

SALES ANALYSIS REPORT



KPI Cards (Left Side)

- *Provides overall business performance summary.*
- *Shows aggregated values from the dataset.*

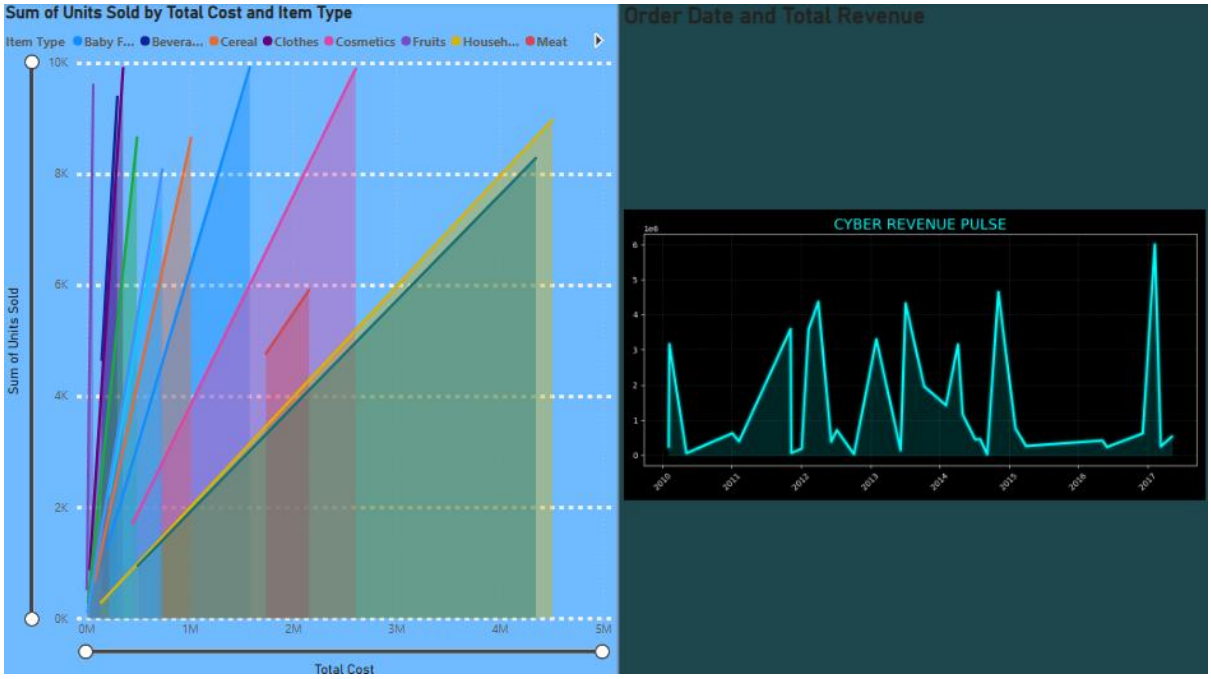
Gauge Chart – Revenue Target

- *Compares actual revenue against a goal.*
- *Shows performance level visually.*

Correlation Matrix/Heatmap – Profit, Revenue & Units

- *Shows statistical relationship between numerical variables.*
- *Helps understand how revenue and units sold impact profit.*

SALES ANALYSIS REPORT



Line Chart (Cyber Revenue Pulse)

- *Tracks revenue changes over time.*
- *Identifies trends and seasonal patterns.*

Scatter/Cost vs Units Chart (Left Side)

- *Analyzes relationship between cost and sales volume.*
- *Helps evaluate pricing efficiency.*
